

Your New Primary School in Brabham

Opening
February 1st 2021

Brabham Primary School (Planning Name)

We invite you and your family to become a part of our dynamic school community, where we live in unity, care for others, have high expectations and endeavour to excel. We will work in partnership with you, to assist your children to reach their potential.

Principal's Welcome

Welcome to your brand new school in the developing suburb of Brabham. This is an exciting opportunity for us all to work together, to develop the school's very own special sense of place. I share a vision for our school, that is more than just a place to learn; it will be a welcoming and well-maintained education hub, that plays a central role in the local community.

Through the recruitment of passionate and engaged educators who value personal excellence, and respect diversity, we will promote a positive and supportive school culture. Educators who are committed to working as part of a dynamic team, to engage and develop resilient, creative and responsible students who care for one another. Collectively, we will foster a dynamic and inclusive learning community that caters for the future needs of 21st Century learners.

As the foundation principal I am honored to be given the opportunity to work in partnership with the community, to establish a shared vision for the school's future. Valuing parents as partners in their child's education, I look forward to working together to support a community of learners; where students, families and staff are all actively encouraged to share a lifelong passion for learning.

We want every student to enjoy a positive experience at our school, to achieve the best possible educational outcomes, and to leave school with the confidence to make a worthwhile contribution to the community. Whether you are already a member of the school community, a prospective member or simply interested in finding out more about the school, we welcome the opportunity to share our evolving vision for the school.

Anika Blackmore

Creating a love of learning

We will provide innovative and engaging learning experiences, which promote individual excellence and develops social responsibility. We will strive to instil a lifelong love of learning through meaningful and challenging learning programs, within a safe, caring and inclusive environment.

We aim to empower student learning through programs that encourage our students to become self-motivated, successful and active citizens. Our goal is for every student to enjoy a positive schooling experience. We want them to leave school with the capability and optimism to realise a preferred future and to lead personally fulfilling lives.

A Supportive and Inclusive Learning Environment

Our goal is to promote an inclusive and resilient learning community where every child, staff member and family can feel safe and supported.

We value student engagement and wellbeing. Our inclusive school will have a safe, respectful learning environment which supports the wellbeing of every child to connect, succeed and thrive. We aim to achieve the highest standards for each child regardless of their starting points. Whatever your child's individual circumstances, we aim to tailor a curriculum to meet their needs; one which facilitates enjoyment in learning and provides opportunities for all. We encourage all students to play an active and positive role in their communities. We will ensure all are listened to, all are valued, and encourage and celebrate individual endeavours and achievements.

Diverse Learners

Every student has individual and diverse learning needs. We recognise that children learn at varying rates and in different ways, so learning will be planned, implemented and evaluated to best cater for individual needs. English as Additional Language (EAL/D) learners and students with special needs are catered for, and encouraged to actively engage in school life. A collaborative team approach will ensure targeted intervention and support to enable every child to achieve their personal best.

Foundations for Learning

We know that in order for students to be successful they need well developed literacy and numeracy skills. Through a comprehensive approach, our programs will ensure that every child acquires the core skills, knowledge and attitudes required to become confident and competent learners.

Early Childhood Education

Early Childhood Education is the foundation for lifelong learning. We believe all children should feel nurtured, respected and supported to build positive relationships within a safe and caring environment. Our Early Childhood programs will promote the principles of the Early Years Learning Framework and recognize that children need opportunities to interact and build trusting relationships. Both indoor and outdoor learning environments are carefully planned to ensure that children are provided with the opportunity to engage in stimulating, meaningful experiences. National Quality Standards are deeply reflected upon and learning opportunities will include planned, purposeful play, balanced with the explicit teaching of essential foundation skills and concepts.

Contemporary Approaches to Curriculum - Future Ready Citizens

Our dedicated staff will provide a comprehensive curriculum covering all aspects of the Western Australian Curriculum. Enriched curricular and extra-curricular programs aim to provide opportunities for students and staff to engage actively with networks of schools and the local community. Our students are provided with opportunities to participate meaningfully in all learning areas including: Visual and Performing Arts, Science, Physical Education and a Languages program.

Our new school will reflect the needs and interests of a contemporary community, one that is quickly evolving through rapid advances in technology. This brings new and exciting teaching and learning opportunities. We will work in partnership with the community to develop and deliver innovative Science, Technology, Engineering and Mathematics (STEM) programs. Through these programs we aim to equip our students with the skills necessary to utilise a range of technologies to enhance student learning; whilst fostering critical thinking, communication, collaboration and creativity.

Excellence in Teaching and Learning - Quality Educators

High performing learning communities consistently use evidence based teaching and learning practices that centre on the reflective use of data and differentiation to support all students. Ongoing assessment will be an important part of our school's pedagogy, and is used to provide feedback to students at the point of error, measure student progress, and for planning next steps in learning.

Our school is committed to developing a school-wide, professional team of highly capable teachers and support staff. Through comprehensive and quality professional learning programs we instil a culture of collective responsibility for student learning and success. Our merit selected, experienced educators will be committed to continuous self-improvement and building their leadership skills both within and beyond the classroom.

A Culturally Responsive Learning Community

Educators pride themselves on promoting a culturally inclusive curriculum that reflects the cultural, linguistic (language), and religious diversity of our school community.

Effective relationships and partnerships promote positive outcomes for students and is central to everything we do. We care for all, and promote a strong commitment to continually developing a culture that responds to the needs of students, staff, parents and carers.

Educators receive ongoing training and support to ensure a continued focus on culturally responsive practices. Everyone shares a commitment to working in partnership with families and community groups. A broad range of communication strategies are used to ensure that all members of our school community have input and ownership into the future directions of our school.

For more information about the school or how to enrol your child please call:
